

Startup of Takahama Unit No. 4

May 17, 2017

President and Director, Shigeki Iwane

The Kansai Electric Power Co., Inc.

We hereby announce that at Takahama Unit No.4, the reactor started up at 17:00 today.

After successfully completing the reactor startup, which is one of the important steps in the process of resuming power operation, we will take sincere and deliberate actions on a continuous basis to support the inspections to be performed by the Nuclear Regulation Authority. Taking this opportunity, I would like to encourage each and every one of our employees and the employees of all the contractors to renew a resolve to pursue the nuclear safety and to make an untiring effort. We will commit ourselves to enhancing the safety furthermore and making steps forward carefully with maintaining an atmosphere of tension while giving top priority to safety.
