We inform you that a rate deduction implementation date was announced as follows at the February press conference with our president today.

○ A statement released at the February press conference with our president

“By resuming full operation of Unit 4 at our Takahama Power Station, we will have both Units 3 and 4 online at the station. This will allow us to cut back on fuel costs at our thermal power plants and we want to pass those savings onto our customers. Therefore, as of today, we are starting the process of making final calculations, preparing reports and taking all other necessary steps to lower electricity rates beginning May 1, 2016.”
