Today the Osaka High Court decided to disaffirm the decision of a provisional disposition preventing the operation of Units 3 and 4 of Takahama Nuclear Power Station.

After filing an appeal with the Osaka High Court on July 14, 2016, we pointed out that the decision of the Otsu District Court was lacking rationality and again explained conscientiously from scientific and technical viewpoints that safety of Units 3 and 4 of Takahama Nuclear Power Station was secured.

We consider that today's decision results from the court's understanding of such explanation that safety of Units 3 and 4 of Takahama Nuclear Power Station was secured.

We have undertaken full check of safety management as instructed by Fukui Prefecture in connection with an accident of fall-down of a crane at Takahama Nuclear Power Station and are currently performing assessment and compilation of results so far obtained.

From now on we will ensure to take a measure for prevention of recurrence and for safety management of nuclear plants based on results of the full check etc.

As with this background we are proceeding with preparation toward resumption of operation of Units 3 and 4 of Takahama Nuclear Power Station placing the highest priority on safety while obtaining understanding of Fukui Prefecture as well as people in the region where the power station is located, the situation is that we cannot estimate influence of today's decision on our financial results.

If any matter to be disclosed such as influence on financial results etc. becomes apparent in future, we will promptly inform you of it.
