Company Representative: Shigeki Iwane, President and Director
Contact: Michiya Sakata, General Manager, Office of Accounting and Finance
Tel: +81-6-6441-8821

We hereby announce that Ohi Unit No.4 (pressurized water reactor, rated electric output: 1,180MW, rated thermal output: 3,423MW), which has been under the 15th periodic outage inspection since September 15, 2013, is expected to start up on May 9 and reach the criticality on May 10, 2018.

After reaching the criticality, the plant will start power control operation on May 11, 2018 as the final stage of the periodic outage inspection following various types of tests. In early June, the plant will restart full-scale operation after the completion of the comprehensive inspection performed by the Nuclear Regulation Authority.

※The scheduled date and work plans of Ohi Unit No.4 restart may be subject to change according to the circumstances.
