We hereby announce that Mihama Unit No.3 (pressurized water reactor, rated electric output: 826MW, rated thermal output: 2,440MW), which has been under the 25th periodic outage inspection since May 14, 2011, is expected to start up on June 23 and reached the criticality on June 24, 2021.

After reaching the criticality, the plant will start power control operation on June 29, 2021 as the final stage of the periodic outage inspection following various types of tests. On July 27, the plant will restart full-scale operation after the completion of the comprehensive inspection performed by the Nuclear Regulation Authority.
