Today, we received approval from the Nuclear Regulation Authority on the extension up to 60 years of the operating period of the Takahama Nuclear Power Station Units 3 and 4 and the revision of our nuclear reactor facility safety policy based on the premise that the facilities will operate beyond 40 years.

These applications were submitted to the Nuclear Regulatory Commission on April 25, 2023.

We will continue to make efforts to improve the safety and reliability of our nuclear power stations and, with your understanding as well as those of the local community, utilize nuclear power generation as our key power source.
