In order to implement measures of spent fuels steadily, we formulated Spent Fuel Measures Roadmap (hereinafter “Road Map”), as a guideline to complement our Propulsion Plan for Spent Fuel Measures on October 2023.

Today, we revised Road Map, as followings

< Rokkasho Reprocessing Plant (RRP) of JNFL >

- RRP will start reprocessing in FY2027, and receiving spent fuels in FY2028.
- Regarding shipment of our spent fuels to RRP, we will transport 198 tons (approximately 60% of total reprocessing volume ) spent fuels over 3 years by FY2030.

< The empirical R&D project for SF-MOX reprocessing >

- Regarding the empirical R&D of SF-MOX rep., we secure the additional 200 tons for shipping with the aim of data enhancement (Total amount of shipping from our NPPs for R&D is approx. 400 tons of SFs.)
- 100 tons of them will be shipped from FY2030.

From now on, we will steadily proceed evacuation of our spent fuels out of Fukui Pref., in line with this Road Map.
