(1) Overview of Operating Results

① Consolidated Operating Results

The Kansai Electric Power Group (the “**Group**”) has consistently advanced the “KX (Kanden Transformation)” through efforts across the entire Group in the final year of its Medium-term Management Plan and largely achieved the financial targets set forth in the Plan.

Total electricity sales volume (the sum of retail electricity sales and electricity sales to other companies) decreased by 2.5% compared with the previous fiscal year, to 152.2 TWh.

On the revenue side, net sales decreased by ¥280,473 million (-6.5%) compared with the previous fiscal year, to ¥4,056,638 million, mainly due to a decrease in electricity sales revenue.

On the expense side, operating expenses decreased by ¥249,152 million (-6.4%) compared with the previous fiscal year, to ¥3,619,081 million, mainly due to decreases in the cost of purchased power from other suppliers and thermal fuel costs.

As a result, the consolidated operating results for the fiscal year ended March 31, 2026 were as follows:

	Change	(33,952)	7,278	149	12,831

[Energy Segment]

The Group will contribute to Japan's growth by promoting both stable energy supply and decarbonization, as outlined in the Seventh Strategic Energy Plan and the GX2040 Vision, and by achieving S+3E (safety, energy security, economic efficiency, and environmental sustainability) at a high level in line with the changing times.

To strengthen its generation portfolio, ensuring a stable power supply to meet increasing electricity demand and decarbonization needs, the Group will promote the maximum utilization of nuclear power with safety as the top priority and advance studies and technological development toward the construction of successor plants. At the same time, the Group will actively develop renewable energy in optimal locations nationwide and pursue the development and replacement of LNG-fired thermal power plants on the premise of future decarbonization.

Furthermore, the Group will strongly promote "Energy 3.0," delivering best-in-class One-Stop solutions and pursuing new business opportunities in an integrated manner to provide optimal solutions to customers, while aiming to be a partner of choice for customers across Japan and overseas and to grow together with them over the long term.

On the revenue side, net sales to external transactions decreased by ¥279,392 million (-7.9%) compared with the previous fiscal year, to ¥3,261,386 million, primarily due to a decrease in electricity sales revenue.

On the expense side, ordinary expenses decreased primarily due to decreases in the cost of purchased power from other suppliers and thermal fuel costs.

As a result, segment profit decreased by ¥33,952 million (-8.3%) compared with the previous fiscal year, to ¥377,368 million.

[Transmission and Distribution Segment]

The Group conducts the operation of power systems as well as the planning and construction of transmission, substation, and distribution facilities, and delivers electricity safely and stably to customers from a neutral and fair standpoint.

Amid increasingly diverse social needs related to energy, including decarbonization and resilience enhancement, the importance of the transmission and distribution business as a fundamental infrastructure continues to grow. The Group will contribute to the development of local communities by advancing the next-generation power network and continuously providing grid access services tailored to the needs of diverse users, including distributed energy resources.

On the revenue side, net sales to external transactions decreased by ¥2,899 million (-0.7%) compared with the previous fiscal year, to ¥386,221 million, primarily due to a decrease in electricity sales to other companies associated with supply-demand adjustment transactions.

On the expense side, ordinary expenses decreased primarily due to a decrease in costs associated with supply-demand adjustment transactions.

As a result, segment profit increased by ¥7,278 million (+13.0%) compared with the previous fiscal year, to ¥63,073 million.

[Information and Communication Technology Segment]

The Group provides three services - optical Internet, optical telephone, and optical television - under the “eo Hikari” brand throughout the Kansai region using FTTH, while also expanding its mobile service “mineo” and corporate solution businesses nationwide.

On the revenue side, although there was an increase in revenue due to growth in corporate services at OPTAGE Inc., net sales to external transactions decreased by ¥1,388 million (-0.6%) compared with the previous fiscal year, to ¥222,196 million, primarily due to the exclusion of certain consolidated subsidiaries from the scope of consolidation. Meanwhile, including internal sales, total net sales increased by ¥6,091 million (+1.9%) compared with the previous fiscal year, to ¥318,723 million, primarily due to an increase in system development projects for the Group at Kanden Systems Inc.

On the expense side, ordinary expenses increased primarily due to higher selling, general and administrative expenses, including personnel expenses and sales commissions at OPTAGE Inc., as well as increased costs associated with system development projects at Kanden Systems Inc.

As a result, segment profit increased by ¥149 million (+0.3%) compared with the previous fiscal year, to ¥47,094 million.

[Life/Business Solutions Segment]

In addition to comprehensive real estate businesses such as leasing, sales, and property management, as well as leisure-related services, the Group provides services that contribute to customers’ safe, comfortable, and convenient lifestyles and business activities, including call center operations and medical and healthcare services.

On the revenue side, net sales to external transactions increased by ¥3,206 million (+1.7%) compared with the previous fiscal year, to ¥186,833 million, primarily due to an increase in rental income from residential and commercial properties in the leasing business of Kanden Realty & Development Co., Ltd.

On the expense side, ordinary expenses decreased primarily due to a reduction in the cost of sales, including property costs, in the housing sales business of Kanden Realty & Development Co., Ltd.

As a result, segment profit increased by ¥12,831 million (+49.0%) compared with the previous fiscal year, to ¥39,039 million.

(Additional Information)

Stock-based Compensation System for Executive Officers and Corporate Officers

The Company has introduced a stock-based compensation system (the “System”) for its executive officers and corporate officers (excluding those who are non-residents of Japan; hereinafter collectively referred to as the “Eligible Executives”) with the aim of enhancing their awareness of contribution to the medium- to long-term improvement of the Group’s corporate value.

a. Outline of the transaction

The System adopts a structure known as a Board Incentive Plan (BIP) trust (the “Trust Account”). Under this structure, Company shares are acquired through the Trust Account using funds contributed by the Company as compensation for the Eligible Executives. Based on their respective positions, the Eligible Executives receive Company shares and cash equivalent to the proceeds from the conversion of such shares.

The accounting treatment for the System is in accordance with the Practical Solution on Transactions of Delivering the Company’s Own Stocks to Employees, etc. through Trusts (ASBJ, Practical Issues Task Force No. 30, March 26, 2015).

b. Company’s shares remaining in the Trust Account

Company’s shares remaining in the Trust Account are recorded as treasury stock under net assets at their carrying amount in the Trust Account (excluding incidental costs).

As of the end of the current consolidated fiscal year, the carrying amount and number of such treasury stock were ¥718 million and 516,856 shares, respectively.

(Segment Information)

① Outline of Reportable Segments

The Group’s reportable segments are components of the Group for which segregated financial information is available. These segments are subject to regular review by the Executive Meeting of the Company for the purpose of making decisions regarding the allocation of management resources and evaluating business performance.

Based on the Kansai Electric Power Group Medium-term Management Plan (2021-2025), the Group has identified four reportable segments: the Energy Segment, which provides new value through diverse solutions, such as electricity, gas, and utility services; the Transmission and Distribution Segment, which ensures the safe and stable supply of electricity from a neutral and fair standpoint; the Information and Communication Technology Segment, which offers comprehensive information and communication services; and the Life/Business Solutions Segment, which provides real estate related services as well as life and business related services.

② Measurement of Sales, Profit or Loss, Assets, Liabilities and Other Items by Reportable Segment

The accounting methods applied to the reported business segments are consistent with the accounting policies adopted for the preparation of the consolidated financial statements. Segment profit is measured on a basis that excludes dividends received from consolidated subsidiaries and equity-method affiliates from ordinary profit.

Intersegment transactions are generally conducted at prices based on arm’s-length transactions.

③ Information regarding the amounts of net sales, profit or loss, assets, liabilities, and other items for each reportable segment

Tendering Shares in a Tender Offer for Own Shares by KINDEN CORPORATION

In connection with the resolution by KINDEN CORPORATION (“**KINDEN**”), an equity-method affiliate of KEPCO, at its Board of Directors meeting held on April 27, 2026, to conduct a tender offer for its own shares (the “**Tender Offer**”), KEPCO and its wholly owned subsidiary, Kanden Realty & Development Co., Ltd. (“**KRD**”), resolved at KEPCO’s Board of Directors meeting held on the same date to tender the common shares of KINDEN held by KEPCO and KRD in the Tender Offer.

Even if the planned number of shares to be sold, namely 33,500,000 shares of KINDEN, are sold upon completion of the Tender Offer, KINDEN will continue to be an equity-method affiliate of KEPCO.
