Notice Regarding Revisions to Low-Voltage Electricity Rate Plans in the Tokyo Metropolitan Area

The Kansai Electric Power Company, Incorporated (the “Company”) previously announced that, in light of changes to the Wheeling Service Terms and Conditions by the respective general transmission and distribution companies^{*1}, it would revise electricity rate plans and other related items in the regulated and liberalized sectors effective November 1, 2026, to reflect the revised wheeling charges^{*2,*3}

[Notice Regarding Electricity Rate Revisions Following Changes to the Wheeling Service Terms and Conditions, disclosed on September 29, 2026]

The Company hereby announces that it has decided today to revise low-voltage electricity rate plans in the Tokyo metropolitan area effective November 1, 2026.

^{*1}: News release issued by the Ministry of Economy, Trade and Industry (September 11, 2026)

^{*2}: Wheeling charges refer to fees for the use of transmission and distribution facilities incurred when electricity is delivered to customers through the transmission and distribution facilities of general transmission and distribution companies, as well as fees imposed on electricity generators when generation facilities are connected to such transmission and distribution facilities and the electricity generated is supplied to the power grid.

^{*3}: The Company had stated that electricity rate plans for the Tokyo metropolitan area in the low-voltage sector would be announced separately once preparations were complete.
