

Message from the Responsible Director

Makoto Araki

Representative Executive Officer,
Vice President

In March 2021, we formulated the Kansai Electric Power Group Management Philosophy Purpose & Values and declared to the world that we would conduct business activities while upholding the Values of Fairness, Integrity, Inclusion, and Innovation to attain our Purpose of Serving and Shaping the Vital Platform for a Sustainable Society.

In the same year, we formulated the Kansai Electric Power Group Medium-term Management Plan (2021–2025) (updated in April 2024) in conjunction with the Kansai Electric Power Group Zero Carbon Vision 2050 and the Kansai Electric Power Group Zero Carbon Roadmap to better handle global warming issues on a voluntary and proactive basis as a “leading company in zero-carbon energy.”

We have been working to achieve sustainable growth for the Group and help bring about a sustainable society, with a focus on delivering safe, stable, environmentally friendly energy; building a robust corporate constitution through accelerated digitalization, innovation, and workstyle reforms; solving global social issues such as SDGs through new businesses; and establishing a solid foundation through governance and compliance promotion.

Through our steady efforts, we achieved our target of “reducing fiscal 2025 power generation CO₂ emissions by half from levels in fiscal 2013” two years ahead of schedule. Following this, we have set new challenging greenhouse gas (GHG) reduction targets in the Zero Carbon Roadmap, revised in April 2024, as an example of significant progress in our pursuit of zero carbon and creating new value.

Going forward, we will push ahead with initiatives that respond to changes in the business environment and in stakeholder expectations and requests, and to help make society more sustainable. Equally, we will work proactively to provide information on those initiatives.

Editorial policies

► Positioning of ESG Report

This report brings together all ESG-related information disclosed in our Integrated Report, on websites, etc., as well as including content with additional details. With reference to the GRI standards and other ESG reporting guidelines, we have organized the content by item—Environment, Social and Governance—to make it easier to browse through the information.

Please also refer to our Integrated Report for details on the Group’s growth strategy and important initiatives related to sustainability.
