

# Financial and Nonfinancial Highlights

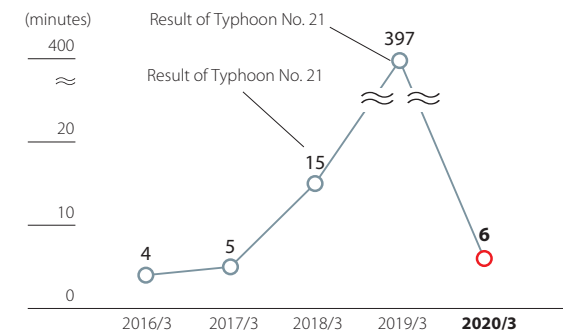

## Operating revenues / Operating income

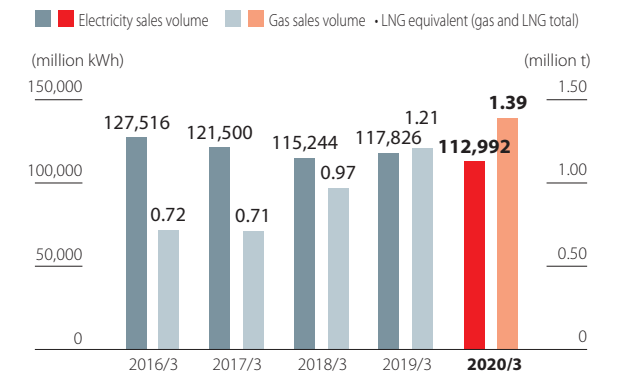

## Ordinary income

## Annual duration of power outage per household

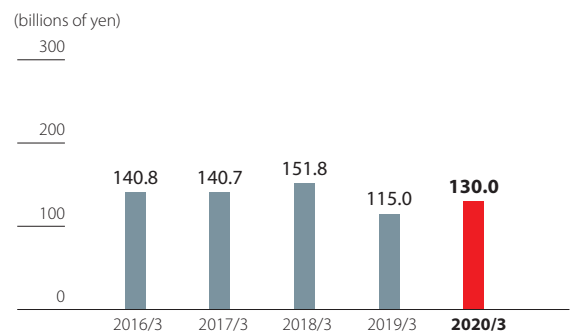

## Electricity sales volume / Gas sales volume

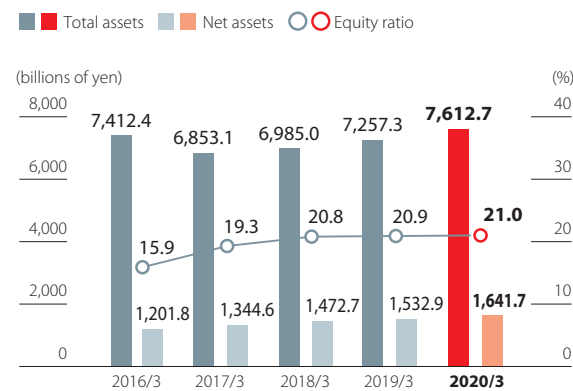

We are working diligently to run power grids reliably, arrange facilities optimally and prevent the recurrence of accidents. As a result of these efforts, with the exception of major natural disasters, we are maintaining one of the world's highest power quality levels in Kansai Transmission and Distribution, Inc.

In order to have customers choose our Company, we are providing products and services as a comprehensive energy business that supplies not only electricity but also gas.

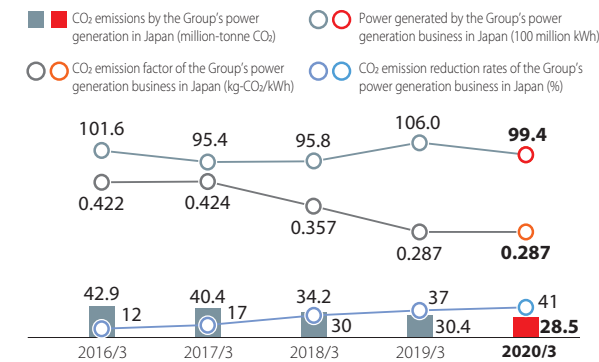

## Net income attributable to shareholders of the parent for this fiscal year

## Total assets, Net assets, Equity ratio

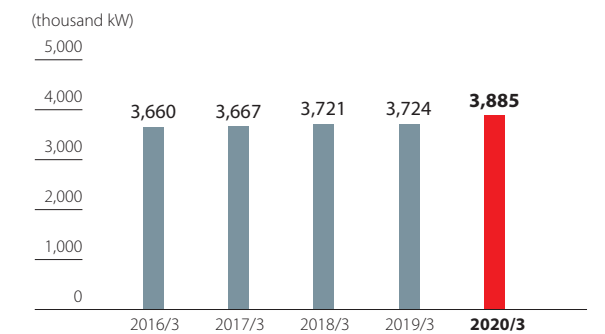

## Group's CO<sub>2</sub> emissions and CO<sub>2</sub> emission factors associated with power generation in Japan

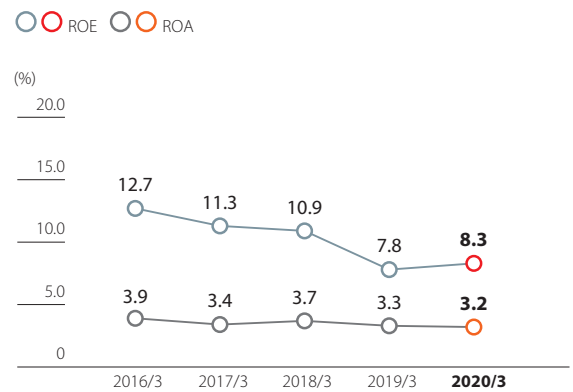

We are working to reduce the carbon impacts of electricity that we provide to customers, starting with efforts for the operation of nuclear power plants with safety as the top priority. Our efforts also include the maintenance and improvement of the thermal efficiency of thermal power plants as well as the development and popularization of renewable energies.

## Accumulated capacity of renewable energy source facilities [consolidated]

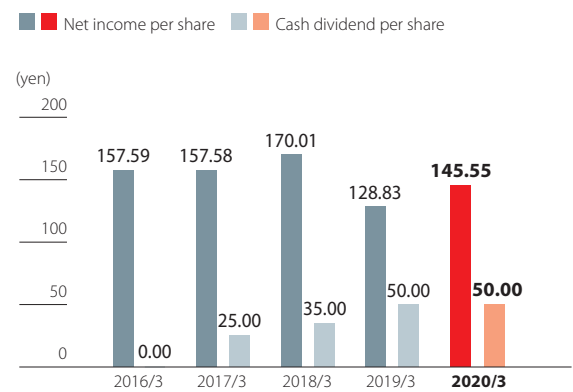

With the set target of 6 million kW capacity of renewable energy source facilities in Japan and overseas by the 2030s, we will work to newly develop more than 2 million kW as a leading "decarbonization" company.

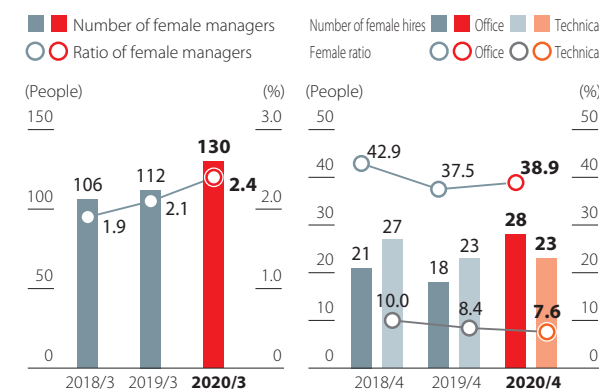

## ROE, ROA

## Net income per share / Cash dividend per share

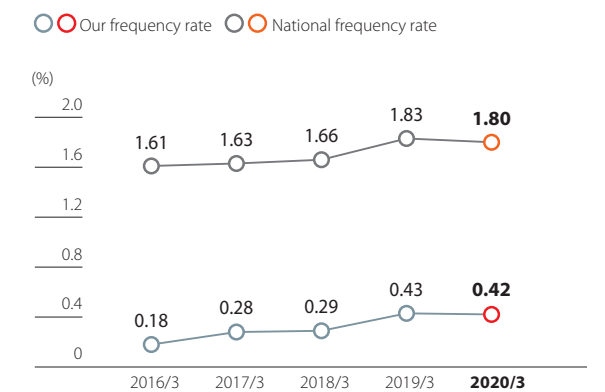

## Number of female managers and number of female hires

To further promote the active participation of female employees, we have set female employment target ratios for management staff as well as those for office and technical staff, and we are working to achieve them.

## Accident frequency rate

When accidents occur, we formulate recurrence prevention measures based on the results of investigations and analyses. By rolling these out consistently throughout the Company, we are striving to achieve "zero accidents."
