

Value Creation Process for the Kansai Electric Power Group

Based on accurately understanding global social issues and environmental changes, by utilizing the strengths that we have cultivated and delivering new value, our Group will serve continuously our customers and communities as a major player of a "shared infrastructure supporting the realization of a sustainable society in the future."

The value creation process is stated in our current Medium-term Management Plan and going forward, as we look to review our Medium-term Management Plan, we shall also seek to review our value creation process. Currently with the infectious spread of the coronavirus, we are looking to review our Medium-term Management Plan, reacting to changes in our business environment and investment efficiency, while seeking flexibility in our business portfolio.
