

Announcement of Return to Commercial Operation of Takahama Unit No.4

June 16, 2017

The Kansai Electric Power Co., Inc.

We hereby announce that Takahama Unit No.4 (pressurized water reactor, rated electric output: 870MW, rated thermal output: 2,660MW), which undertook the 20st periodic outage inspection on July 21, 2011 and then entered power control operation as the last stage of the periodic outage inspection on May 22, 2017, has resumed commercial operation at 17:00 today after completing the final inspection (i.e., integrated plant performance test)* by the Nuclear Regulation Authority.

* The completion of integrated plant performance test (i.e., receipt of the certificate of the completion of periodic outage inspection) means the completion of periodic outage inspection.
