

Announcement of Return to Commercial Operation of Ohi Unit No.3

April 10, 2018

The Kansai Electric Power Co., Inc.

We hereby announce that Ohi Unit No.3 (pressurized water reactor, rated electric output: 1,180MW, rated thermal output: 3,423MW), which undertook the 16st periodic outage inspection on September 2, 2013 and then entered power control operation as the last stage of the periodic outage inspection on March 16, 2018, has resumed commercial operation at 16:40 today after completing the final inspection (i.e., integrated plant performance test)* by the Nuclear Regulation Authority.

* The completion of integrated plant performance test (i.e., receipt of the certificate of the completion of periodic outage inspection) means the completion of periodic outage inspection.
