

Piiparinmäki Onshore Wind Farm successfully commences commercial operations

June 16, 2022

The Kansai Electric Power Co., Inc.

As announced on Apr. 27th 2020, The Kansai Electric Power Co., Inc. (Kansai) had signed a share purchase agreement through its subsidiary, KPIC Netherlands B.V., to acquire a 15% stake of the Glennmont Clean Energy Fund III Wind B.V.

Kansai has announced that Piiparinmäki onshore wind farm (hereafter referred to as “Piiparinmäki ”) has commenced commercial operations from June 10th 2022. Piiparinmäki has 41 wind turbines with a total power output of 211,000kW installed in the central Finland, which is around 450 km north from Helsinki. It is now one of the largest onshore wind farms in Finland, and Kansai’s 9th operating overseas renewable energy project.

Kansai is firmly committed to promoting energy businesses that contribute to achieving a zero-carbon society across the world by making active use of technological strength and expertise cultivated throughout our company’s history.
